QUALITY INSTRUMENTS. TRUSTED PERFORMANCE

*****ONE STOP SOLUTIONS FOR ALL LABS NEEDS*****

INTRODUCTION

- We would like to introduce our company YSP Equipments, specializing in the manufacturing of cleanroom and laboratory furniture made from high-quality stainless steel and mild steel. All our products are customized to meet the specific requirements of our clients.
- We are an established company with a strong track record of delivering excellent customer satisfaction, without compromising on quality or service. We offer a wide range of products catering to industries such as pharmaceuticals, chemical laboratories, food processing, educational institutions, and other related sectors—all at competitive prices.
- Please feel free to get in touch with us for any of your cleanroom and laboratory furniture requirements. A detailed brochure of our products and specifications is available upon request.
- We look forward to building a long-term relationship and achieving mutual success together.

Our Vision :

- Our vision is to be a leading international furniture manufacturer offering innovative and superior quality products.
- In providing the best value-for-money products accompanied by the best service in the industry, right from design to delivery.

Our Mission :

- Our mission is to create value for our customers through reliability and flexibility.
- We will achieve our aims through implementing the following values.

SS 304/316 Material of Construction Made in 18/16 Gauge

- Stainless Steel Lockers are specially designed & fabricated for the use of Pharma Company. Entire Locker will be fabricated from SS 304 2B prime material quality, to get the better finish, entire welding work is done by Argon welding. It is highly used in pharmaceuticals Warehouse, Production area, Change Room, Airlocks. It has a smooth shiny metallic structure and appearance.

Durability

- Stainless steel does not dent, crack, break, or pit easily. This prevents from dirt and bacteria forming on our equipment. It can withstand abrasive materials & chemicals.

Longevity

- Because of its resistance to corrosion and rust, stainless steel equipment is known for its long-lasting functionality.

Finish : Matt / Mirror Polish

SS 304/316 Material of Construction Made in 18/16 Gauge

- Stainless steel liquid samplers are designed for accurate sample collection, including point samples, cross-sectional samples, and all-layer sampling of viscous substances, liquids, and powders. These samplers are ideal for use in acidic environments and hard-to-reach areas, making them suitable for hygienic applications across industries.

Durability

- Stainless steel is highly resistant to dents, cracks, breakage, and pitting.
- This helps prevent the accumulation of dirt and bacteria on the equipment.
- It is capable of withstanding abrasive materials and harsh chemicals.

Longevity

- Due to its strong resistance to corrosion and rust, stainless steel equipment ensures long-lasting performance and reliability.

Finish: Matt / Mirror Polish

SS 304/316 Material of Construction Manufactured in 18/16 Gauge

- A sieve, also known as a mesh strainer or sifter, is used to separate required particles from unwanted materials or to control particle size distribution. It works using woven mesh, perforated sheets, or similar screening materials. The term "sift" is derived from the use of sieves.

Durability

- Stainless steel is resistant to dents, cracks, breakage, and surface damage.
- This helps maintain hygiene by preventing the buildup of dirt and bacteria on the equipment.
- It is also capable of handling abrasive substances and chemical exposure.

Longevity

- With excellent resistance to corrosion and rust, stainless steel ensures durability and long service life.

Finish: Matt / Mirror Polish

SS 304 / 316 Material Of Construction

- It is made using pure stainless steel material that prevents moisture throughout the term life.
- The unit is hard enough to be used for a long time. It is highly used in pharmaceuticals.
- Warehouse, production area. It has a smooth shiny metallic structure and appearance.
- Durability: Stainless steel does not dent, crack, break, or pit easily.
- This prevents dirt and bacteria from forming on our equipment.
- It can withstand abrasive materials & chemicals. Longevity: Because of its resistance to corrosion and rust, stainless steel equipment is known for its long-lasting functionality.

Finish: Matt / Mirror Polish

SS 304 / 316 Material Of Construction **Made in 18 / 16 Gauge**

- Pass box is one of the cleanroom systems, which is used to transfer materials from one side to other side through controlled environment in order to avoid airborne cross contamination.
- Two Stage Filtration
- Available in SS 304 / SS 316 or a combination of both.
- EU6 – Prefilter (95% down to 5 micron)
- EU14 – HEPA Filter – Supply (99.999% down to 0.3 micron)
- Dynamically balanced motor-blower facilitated with suspension arrangement to minimize the noise level.
- Dynamic Pass Box works like an air lock or laminar air flow unit.
- Durability: Stainless steel does not dent, crack, break, or pit easily.
- This prevents dirt and bacteria from forming on our equipment.
- It can withstand abrasive materials & chemicals. Longevity: Because of its resistance to corrosion and rust, stainless steel equipment is known for its long-lasting functionality.

Finish: Matt / Mirror Polish

SS 304 / 316 Material Of Construction

Made in 18 / 16 Gauge

- The material is suitable for Carton & Manual Pass Box Conveyor / Pass between production to packing area.
- Products are customized as per client requirements. Material accessories 0.5 HP motors 1 HP motors (depending on the length)
- High quality gearbox & motor with control panels.

Finish: Matt / Mirror Polish

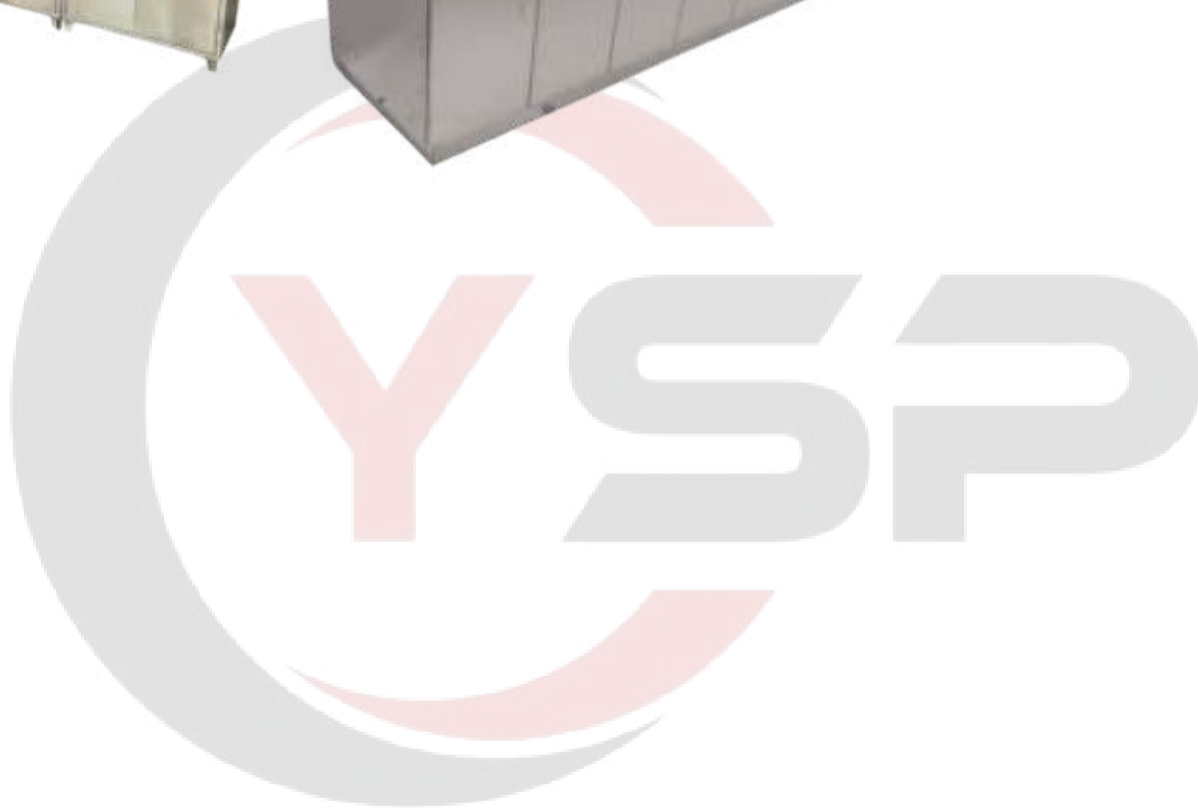

Material Of Construction: GI / MS

Made in 18 / 16 Gauge

- A Laboratory Module is a substitute for a Subject Module and is adaptable to any colour scheme or décor. Mild steel casework is a popular choice for microbiology labs, biological, biomedical, pharmaceutical, and hospital labs.
- This work surface provides excellent chemical and heat resistance and is easy to clean.
- The most common lab furniture categories include laboratory benches, forensic cabinets, apparel dispensers, carts, chemical cabinets, drawers, and general cabinets.
- Durability: Mild steel does not dent, crack, break, or pit easily.
- This prevents dirt and bacteria from forming on our equipment.
- It can withstand abrasive materials & chemicals.
- Longevity: Because of its resistance to corrosion and rust, mild steel equipment is known for its long-lasting functionality.
